

MicroGro

BIO INOCULANT

All Organic Biological Inoculant

BUILDS IMMUNE SYSTEM OF LAWN AND PLANT ROOTS

MicroGro Bio Inoculant uses advanced Microbiology that colonize around the roots.

MicroGro is completely safe, inexpensive and provides long term plant protection as the microbes continue to grow in the soil. The Humates further accelerate soil and plant health. MicroGro is not labeled as a fungicide.

- Trillions of Rhizosphere microbes
- Helps grow better flowers & turf
- Excellent for growing healthy roots
- Inexpensive long term protection
- Builds big roots
- Completely safe
- 100% slow release and will not burn

USE MicroGro Bio Inoculant to keep your plants healthy.

MicroGro BIO INOCULANT

All Organic Biological Inoculant

SPECIFICATION SHEET

Granulated All Organic Biological Inoculant containing high grade Humate ore, selected Sugars, Kelp, Corn Meal, Brewer's Yeast Extract, Yucca, Potassium Sulfate, Ferrous Ammonium Citrate, selected Amino Acids and MicroGro CM Biological Inoculation package.

MicroGro CM Bio-Inoculant specifications: 500 Billion Rhizobial CFUs per lb. Representing 72 different species & strains. Species include: 1 strain Azospirillum lipoferum, 1 strain Azospirillum brasilense, 6 strains Bacillus subtilis, 2 strains Bacillus firmus, 4 strains Bacillus amyloliquefaciens, 3 strains Bacillus licheniformis, 2 strains Bacillus pumilus, 2 strains Bacillus megaterium, 3 strains Bacillus coagulans, 1 strain Bacillus azotoformans, 1 strain Bacillus mojavensis, 3 strains Paenibacillus polymyxa, 1 strain Paenibacillus durum, 1 strain Pseudomonas fluorescens, 3 strains Pseudomonas putida, 2 strains Pseudomonas aureofaciens, 3 strains Streptomyces griseus, 2 strains Streptomyces lydicus, 2 strains Streptomyces coelicolor, 2 strains Trichoderma harzianum, 1 strain Trichoderma viride, 2 strains Trichoderma reesei, 1 strain Trichoderma koningiopsis.

All MicroLife products are protected by patented technology and proprietary manufacturing processes.

MicroGro Bio Inoculant Benefits

- Effective and inexpensive way to inoculate your soil with trillions of beneficial microorganisms.
- Grows bigger and healthier roots
- Will improve all soils allowing more oxygen and greater root growth
- Adds long chain carbon molecules and over 100 minerals
- Feeds existing beneficial microbes
- Will not burn and is completely safe for all beneficial life forms

RATES:

Turfgrass: 5–10 lb per 1,000 sq ft

Severe Turfgrass Problems: 20 lb per 1,000 sq ft

New Installs of All Garden Beds: 10 lb per 1,000 sq ft worked into the soil 4"
